<b>Call a number</b>	Standard phone feature
<b>Call a contact (using phone number/IM id)</b>	Standard phone feature
<b>Send/Receive files during conversation</b>	<b>Context Scenario 1</b>
<b>Receive a call</b>	Standard phone feature
<b>Adjust volume during call</b>	Standard phone feature
<b>Call History</b>	Standard phone feature
<b>Call Forwarding</b>	<b>Context Scenario 2</b>
Messaging	
<b>Receive, send SMS</b>	<b>Context Scenario 2, Standard Phone Feature</b>
<b>Email</b>	<b>Context Scenario 1, Standard Phone Feature</b>
<b>Instant Messaging</b>	<b>Context Scenario 2</b>
<b>Message history (Unified Inbox?)</b>	Standard phone feature ( <b>room for innovation?</b> )
Documents	
<b>Create documents</b>	
<b>Open documents using local viewers/editors</b>	<b>Context Scenario 1</b>
<b>Store documents locally</b>	<b>Context Scenario 1</b>
<b>Store documents on remote drive</b>	<b>Context Scenario 2</b>
<b>Browse/Search documents</b>	<b>Context Scenario 1</b>
Web	
<b>Web browsing</b>	<b>Persona need</b>
Synchronization	
<b>Synchronize with PC (+Mac?)</b>	<b>Context Scenario 2</b>
<b>Access remote storage and make available as local drive.</b>	<b>Context Scenario 2</b>

### Note

The main focus of this task analysis are the tasks inside the scope of the design assignment and tasks related to them

There are, ofcourse, other tasks the device would support, but they are either outside the main scope of this exercise or too many to cover
